DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 28, 32 to 60, and 64 to 66, drawn to an apparatus and method for determining a quality measure, where a probability density for parameters of a predetermined audio model is applied to derive samples of parameter values for an input audio signal, classified in class 704, subclass 240.
 - II. Claims 29 to 31 and 61 to 63, drawn to an apparatus and method for searching a database comprising a plurality of annotations which include annotation data and a quality measure, where a quality measure is determined for an input audio query, classified in class 707, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility such as in an interactive voice response (IVR) system for searching by queries from a user.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2654

4. Claims 32 and 64 link Inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claims, claims 32 and 64. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application. Applicant is advised that if any such claims depending from or including all the limitations of the allowable linking claims is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
